

Lucía Esteban Peña

Microsoft Dynamics 365 Business Central / AL Developer

I build and maintain **AL extensions, business reports and integrations** for Microsoft Dynamics 365 Business Central, working across **SaaS and On-Premise** environments in a consultancy setting.

Open to 100% remote

English & Spanish

Business Central since Mar 2025

PROFESSIONAL EXPERIENCE

Business Central / AL Development

Microsoft Dynamics 365 Business Central / AL Developer

Consultancy environment · Current role

Mar 2025 - Present

- **AL development & extensions:** tables, pages, page extensions, codeunits, events and subscribers, turning functional requirements into maintainable Business Central functionality.
- **Reporting:** AL datasets with RDLC layouts for multi-page customer and supplier documents, including conditional logic, totals and taxes; also multi-sheet Excel reporting.
- **Implementations & migrations:** new implementations, re-implementations and data/code migrations across NAV/BC14, BC21, BC25 and BC28, adapting existing customizations to target versions.
- **Integrations:** APIs, web services, XML, JSON and XMLPorts to exchange information reliably between Business Central and external systems.
- **Environment & delivery:** hands-on SaaS and On-Premise work, with SQL Server, PowerShell and Docker exposure; VS Code, Git and pull-request-based workflow.

TECHNOLOGY MAP

Core

- Business Central
- AL
- Extensions
- Reports / RDLC
- VS Code
- SaaS / On-Premise
- Git / Azure DevOps

EDUCATION

Technical background

IN PROGRESS

Computer Engineering · UNIR

Online degree, partly credited from previous studies, combined with full-time work.

COMPLETED

Higher Technician in Multiplatform Application Development (DAM)

Higher vocational qualification in software development.

PREVIOUS STUDIES

Electronics and Industrial Automation Engineering

2 years completed · Universidad Politécnica de Alcalá.

PROFESSIONAL APPROACH

Clear requirements before code. I analyze the need, define the structure and validate it against the functional specification or with the client. I value clean, scalable code, constructive feedback and solving the underlying problem rather than applying a quick patch.

PROFESSIONAL EXPOSURE

Tools & Integration

SQL Server · PowerShell · Docker · APIs · Web Services · XML · JSON · XMLPorts · Migrations · Upgrades

ADDITIONAL

Programming

Java · HTML / CSS · C fundamentals · Python fundamentals

WORKING STYLE

How I work

- Collaborative with developers and consultants, while comfortable working independently.
- Organized, open to better approaches and decisive when a choice is needed.
- Continuous learner who values feedback and aims to contribute beyond the minimum requirement.
